About HTML5 Image Enhancer

Bring your images to another level with the **HTML5 Image Enhancer**. Create realtime animation effects, reflections, gradients, image filters and transition with only few clicks and without any Flash! Add customizable borders with rounded corners and gradient colors, shadows, and even switch filters on mouse over.

You don't have an HTML5 compatible browser like Internet Explorer? - don't worry we have made a special fall back method, that will use Flash on browsers that do not support the HTML5 Canvas element to achieve the same fantastic results!

Features in Detail

• Amazing Effects with Canvas, CSS3 and jQuery – No Flash required!

Give your image a cool Web 2.0 look with reflections – HTML5 Image Enhancer automatically generates amazing reflections.

• Customizable Borders and Gradients - Add fantastic colorful borders with gradients to your images to get the perfect look.

• Transition Animation – You can display the hoover effects with nice transition animation.

• Switch image filters on mouse over with transition animation - You can also use drop shadow with different colors, size and blur effect.

• **Description** - Give your users additional information about your images and can automatically slide in on Mouse Over.

The Balchik Botanical garden in Bulgaria has an area of 65,000 m² and accommodates 2000 plant species belonging to 85 families and 200 genera. One of the garden's main attractions is the collection of large-sized cactus species arranged outdoors on 1000 m², the second of its kind in Europe after the one in Monaco.

• HTML5 Image Enhancer can be used on iDevices like iPad and iPhone - Take advantage of the build in hardware acceleration and give you the maximum performance and greatest experience.

- You don't have an HTML5 compatible browser like Internet Explorer? don't worry we have made a special fall back method, that will use Flash on browsers that do not support the HTML5 Canvas element to achieve the same fantastic results!

Before you begin

Make sure to setup your site in Dreamweaver first before creating a page. If you don't know how to do that please <u>read this</u>.

Installing the extension

Read the tutorial at http://www.dmxzone.com/go?4671

Login, download the product, and look up your serial at http://www.dmxzone.com/myZone.asp?Section=purchases

Get the latest extension manager from Adobe at http://www.adobe.com/exchange/em_download/

Open the .mxp file (the extension manager should start-up) and install the extension.

If you experience problems please read the FAQ at http://www.dmxzone.com/index?7/1038 before contacting support.

Reference: HTML5 Image Enhancer Filters

There are 7 different filters you can apply to your images: GrayScale, Sepia, Blur, Noise, Posterize, Tint and Invert. You can also apply them as hoover effects.

GrayScale

Sepia

The Basics: Adding Real-time Effects to Images with HTML5 Image Enhancer

In this tutorial we will show you how to add amazing real-time effects to the images on your pages using **HTML5 Image Enhancer**.

*You can also check out the video here.

How to do it

1. **Define your site in Dreamweaver and create a new page** - We've already created our page layout. Now we are going to add three images and apply different effects to them.

🛒 💁 - 🍃 🛐 可 🔜

ŏ-	Gradient]		Filters				-			
	Start Pos:		Start Color:	#000000	3 🔍	GrayScale	Amount	1	4			
•	End Pos:		1	#000000		Sepia	Amount	1				
30	Corner Radiu	IS	J			Blur	Amount					
	Top Left:	0	Top Right:	0		Noise	Amount					
350	Bottom Left:	0	Bottom Right:	0		Posterize	Amount					
	Reflectio	n 1				Tint	Color	#FFFFFF				
4 = 0	Height:	0.2	2 Opacity:	0.33			Amount	0.3				
	Distance:	-5				Invert					-	

5. Now, we're going to add the second image – Click on the HTML5 Image Enhancer icon, browse the image and click the OK button when you're done.

6. Adding Effects to the second image – For this image we will use the same reflection (1) effect with Sepia filter (2).

4. Adding the third image - Click on the HTML5 Image Enhancer icon, browse the image and click the OK button when you're done.

5. Adding Effects to the third image – For the last image we will only use the Tint effect with a **#FFFFFF** color and 0.8 amount.

Now, you can save your work and preview the result in the browser!

Advanced: Enhancing Multiple Images at Once with HTML5 Image Enhancer

In this tutorial we will show you how to apply the same settings to multiple images on your page using the Global Selectors option in **HTML5 Image Enhancer**.

*You can also check out the video <u>here</u>.

How to do it

- 1. Define your site in Dreamweaver and create a new page.
- 2. Adding Images Choose the icon from the DMXzone object bar to apply the extension and add the images on the page page.

3. Adding a dummy class - We are going to add a dummy class, named "images" within the <style></style> tags of our page.

dex.ht	C:\Develop\Animator\index.html	8
ource (Code jquery-latest.pack.js dmxHTTML5ImageEnhancer.js	9
Code	Split Design Live Code 🛒 Live View Inspect 🕄 🗟 🧭 Title: HTML5 Image Enhancer

To edit selection properties, dick Refresh or press F5.</td><td></td></tr><tr><td></td><td></td><td>$\overline{\nabla}$</td></tr></tbody></table></style>	

4. Select the **first image (1)** and the **class** that we've just created from the **Dropdown class** menu **(2)**. We do the same for the other 2 images.

5. Using the Global Selector - Select the Global Selector radio button (1), add a name for this global selector (2) and enter the CSS Class we've just created (3).
