## About HTML5 Parallax Slider

Create stunning presentations with the **HTML5 Parallax Slider**. Divide your content into different slides and add multiple elements in each one to create awesome 3D feeling for your users, fully visual within Dreamweaver. Add any content in your slides like images, text, video, and any HTML content and more. The extension has full touch support so you can swipe between slides with your fingers when you are using mobile devices.

Choose one of the 7 designs or just customize them through the CSS to fit your page. The integrated **DMXzone Image Resizer** will help you set all your images in

one size. Choose the duration of the slides as their transition - vertically or horizontally. Add as many elements as you need in every slide and adjust their position by dragging them fully visual in Dreamweaver design view. You can easily arrange the order of appearance and time transitions to create stunning 3D depth illusion effect.

With the Behavior Connector you can combine the **HTML5 Parallax Slider** with other DMXzone extensions such as <u>CSS Image Gallery</u>, <u>HTML5 Video Player</u>, <u>HTML5 MP3 Player</u>, <u>HTML5 3D Flipping Gallery</u> and many more.

## **Features in Detail**

• Present your content in amazing Parallax slides - Create stunning presentations and organize your content slide by slide.

• Awesome 3D illusion effect - Add multiple elements in every slide and create a 3D feeling for your customers.

• Add any content - In your slide you can add whatever you want - images, text, video, HTML tags, URLs and more.

- **CSS3 Transforms** Uses CSS3 Transforms to deliver smooth animations with hardware acceleration on mobile devices and the latest browsers that support the CSS3 Transforms.
- Full touch devices support You can slide by swiping with your finger touch when using a mobile device.

• Full visual drag & drop design in Dreamweaver - Simply hover over the container, click and drag it in order to move it.

• **Customize your slides** - You can add and remove slides, set the starting slide and rearrange the order. Adding and deleting images takes only a second or you can just import a whole folder. It has integrated DMXzone Image Resizer to help you with your images.

• **Fully controllable by behaviors** - Set different elements to control the Parallax slider with one of these actions - Go to next, play, stop, go to previous and jump to slide.

Control HTML5 Parallax	Slider	×
HTTML5 Parallax Slider: Action:	dmxParallaxSlider 1 Go to Previous	OK Cancel
Slide:	Go to Previous Go to Next Play Stop Jump to slide	

• Great Dreamweaver design preview - You can preview your parallax slider directly in Dreamweaver and see how it looks.

• **Powered by HTML5, CSS3 and jQuery** - Full cross-browser support to deliver the best user experience across all browsers and devices! Uses No Flash at all!

#### Before you begin

Make sure to setup your site in Dreamweaver first before creating a page. If you don't know how to do that please <u>read this</u>.

## Installing the extension

Read the tutorial at <a href="http://www.dmxzone.com/go/4671/how-to-install-extensions-from-dmxzone/">http://www.dmxzone.com/go/4671/how-to-install-extensions-from-dmxzone/</a>

Login, download the product, and look up your serial at <a href="http://www.dmxzone.com/user/products">http://www.dmxzone.com/user/products</a>

Get the latest extension manager from Adobe at <a href="http://www.adobe.com/exchange/em\_download/">http://www.adobe.com/exchange/em\_download/</a>

Open the .mxp file (the extension manager should start-up) and install the extension.

If you experience any problems contact our Live Support!

# The Basics: Basic Usage of HTML5 Parallax Slider

In this tutorial we will show you how to use the **HTML5 Parallax Slider** and the basic features packed in it. \*You can also check out the <u>video</u>.

## How to do it

1. Click the Insert button (1) to add the HTML5 Parallax Slider (2) to your page.

## Advanced: Controlling HTML5 Parallax Slider with Control Behaviors

In this tutorial we will show you how to control **HTML5 Parallax Slider** using Dreamweaver Control Behaviors. \*You can also check out the <u>video</u>.

### How to do it

1. We already added inserted the **HTML5 Parallax Slider** on our page, which contains 3 slides.

 We added three text links that we are going to use in order to control the HTML5 Parallax Slider. Select the first link (1) and click the Tag inspector (2). In behaviors (3), click the add behavior button (4), choose the DMXzone menu item (5) and select the Control HTML5 Parallax Slider (6).

3. In the Control HTML5 Parallax Slider window, select the jump to slide item (2) from the action combo box (1).

ode bootst	esign Live ५ 🚱 🕼 🗠 🛃 🗔 C Title			• ·	
		Control HTML5 Parallax Slider		CS: CS: AP Tag Inspector Attributes Behaviors Tag

4. We **enter 0 in the Slide field** as we need to jump to the first slide. We use 1 for the second slide, 2 for the third slide, etc. We do the same with the other 2 links.

5. Now you can save your work and preview the result in the browser.

## Advanced: Using HTML5 Parallax Slider Behaviors

In this tutorial we will show you how to use **HTML5 Parallax Slider** behaviors. \*You can also check out the <u>video</u>.

#### How to do it

1. We are going to control the HTML5 Video Player using the HTML5 Parallax Slider behaviors. Click the Insert button (1) to add the HTML5 Parallax Slider (2) to your page.

2. Adjust the size and appearance of HTML5 Parallax Slider.
